PERSONAL PROJECTS

Space-X Application (12/2020 - 01/2021)

- A React web application that fetch the data using Space-X api and display data in a web page.
- This website is coded using slandered technologies (HTML, CSS, JavaScript and REACT).
- Using react-slide-show to display all the child images followed by the flight number.
- Finally deploy the code into git hub and also using Heroku to publish website. Web URL: <https://space-x-awesome-app.herokuapp.com>.

HOME AUTOMATION NETWORK (10/2018 - 01/2019)

- Web app for a home automation system that controls light, temperature and more. It typically connects controlled devices to a central hub or "gateway".
- As a web developer. Created majority of the web pages(login, Registration, Home, Sensor, Apartment, a Dashboard for Admin, Admin, Contact Us, About, FAQ, Footer and Drop-down menu) for the website using JAVA and MYSQL(backend), HTML & CSS, JavaScript and NodeJS.
- Defined project scope and drafted the project document.

Campgrounds (personal project) (04/2020 - 06/2020)

- Created a web site with login and registration pages validations. Created one REST Full api using NodeJS and mongoDB.
- The main objective of this project is to create a website and add different items to that website by using CRUD operations.
- Technologies used : Html, CSS, Bootstrap, JavaScript, NodeJS, Express and MongoDB.
