- Progressed landing pages, dashboards and online applications using Html, CSS3, Bootstrap4, Java Script and React .
- Used Scrum Agile methodology in my work (Daily Scrum Meeting, Planning, 1on1 meeting)
- Scope: MERN, Front end technologies, Postman, Visual Studio, Discord.

TOOLS

Eclipse

VS Code

Git

Postman

Discord

Sublime Text

Figma

MongoDB Compass

TECHNICAL SKILLS

`HTML5` `JavaScript` `CSS3` `JQuery`
`Bootstrap4` `MERN` `AJAX` `Core JAVA`
`Angular` `MySQL` `JSON` `Agile` `Git/GitHub`
`API Design Knowledge`

PERSONAL PROJECTS

E-Commerce-Website (02/2021 - 03/2021)
- Designed login and registration portal with validations in both front end and back end using JWT.
- User cannot access main pages without login / registration credentials. proper validation are used for registration.
- Pages are being protected using middleware functionality.
- Once login you will see all the items in my list.
- Only admin can access to perform CRUD operations on user.
- Scope: HTML5, CSS3, JavaScript, Bootstrap, NodeJS, MongoDB Atlas, React, postman, Visual Studio.

Hotel Management System (01/2021 - 02/2021)
- Developed a web application as an usage to book a hotel facility by filtering out features like hotel type, area & cost.
- Majority of web pages in this application are about features of hotel like home, hotel list, hotel information, booking, login & registration.
- Code has been deployed in github.
- Scope: HTML5, CSS3, Bootstrap, NodeJS, Express, MongoDB.

Home Automation Network (10/2019 - 02/2020)
- Created a web application for Home Automation system , which controls temperature, humidity , light & more.
- Application was deployed majorly with login, registration, home, sensor, apartment, a Dashboard for admin, admin portal, contact us, about, faq, footer and drop-down menu.
- It connects controlled devices to a central hub or gateway.
- Team size : 4 members.
- Scope: HTML, CSS, JavaScript, React, Core Java, REST API.
